R. Viskanta, *West Lafayette, Indiana, USA*

Aim and Scope: *Numerical Heat Transfer, Part A: Applications* is an international vehicle for the publication of numerically based, results-oriented papers dealing with problems in heat transfer, mass transfer, and fluid flow. The underlying numerical solutions may be based either on available methodology or on adaptations of moderate extensions of available methods. The presentation of experimental results which support the numerical solutions is also acceptable. However, papers whose main focus is on innovative numerical methodology development should be submitted to a companion journal, *Numerical Heat Transfer, Part B: Fundamentals.*

This journal will be published in two volumes, each containing eight issues, for a total of sixteen issues for publication in 2003.

Abstracted and/or Indexed in: Applied Mechanics Review; CSA Aluminum Industry Abstracts; CSA Computer Information Systems Abstracts; CSA Engineered Materials Abstracts, CSA Environmental Sciences & Pollution Management Database; CSA Metals Abstracts/METADEX; Chemical Abstracts; CSA Corrosion Abstracts; Current Contents/Engineering, Computing, and Technology; Engineering Information Inc.; Information Service in Mechanical Engineering (ISMEC); Materials Science Citation Index™; Nova Information Services Co.; Research Alert; Science Citation Index; and SciSearch.

Production, Advertising, and Subscriptions Office: Taylor & Francis, 325 Chestnut Street, Philadelphia, PA 19106. 215-625-8900, fax 215-625-2940. **Subscriptions:** 215-269-0400. **Production Editor:** Bryan Gardiner.

Subscription Information

Numerical Heat Transfer, Part A: Applications (ISSN 1040-7782) is published monthly (except semimonthly in February, May, August, and November) for a total of 16 issues per year at Taylor & Francis, Inc., 325 Chestnut Street, Philadelphia, PA 19106 by the Taylor & Francis Group, 11 New Fetter Lane, London EC4P 4EE, UK.

Annual Subscription, Volume 43 and 44, 2003

Print ISSN 1040-7782 Institutional: US $2755, UK £1670. Individual: US $1024, UK £621.

A subscription to the print edition includes free access for any number of concurrent users across a local area network to the online edition. Online ISSN 1521-0634 . Institutional subscribers may choose a print subscription, an online subscription, or both.

For a complete guide to Taylor & Francis Group's journal and book publishing programs, and details on advertising in our journals, visit our website: **www.taylorandfrancis.com.**

Periodicals postage paid at Jamaica NY 11431. US Postmaster: Send address changes to **Numerical Heat Transfer, Part A: Applications**, Publications Expediting, Inc. 200 Meacham Avenue, Elmont, NY 11003.

Dollar rates apply to subscribers in all countries except the UK and the Republic of Ireland where the sterling price applies. All subscriptions are payable in advance and all rates include postage. Subscriptions are entered on an annual basis; i.e., January to December. Payment may be made by sterling check, dollar check, international money order, National Giro, or credit card (Amex, Visa, Mastercard/Access).

Orders originating in the following territories should be sent directly to: **India:** Universal Subscription Agency Pvt. Ltd., 101–102 Community Centre, Malviya Nagar Extn, Post Bag No. 8, Saket, New Delhi 110017. **Japan:** Kinokuniya Company Ltd., Journal Department, P.O. Box 55, Chitose, Tokyo 156. **USA, Canada, and Mexico:** Taylor & Francis Inc., 325 Chestnut Street, Philadelphia, PA 19106. **UK and all other territories:** Taylor & Francis Ltd, Rankine Rd., Basingstoke, Hampshire RG24 8PR.

SUBJECT INDEX TO VOLUME 43

A Model, of Coupled Liquid Moisture, and Heat Transfer, in Porous Textiles, with Consideration of Gravity, 501

An Inverse Design Problem, in Determining the Optimum Shape, of Spine and Longitudinal Fins, 155

A Numerical Study, for the Role of Natural Convection, in the Melting GaSb/InSb/GaSb Sandwich System, 31

Combined Mass Suction, and Buoyancy Effects, on Heat Transfer, and Gas Glow, in a Fuel Cell Duct, 341

Computation, of Turbulent Flow, in Porous Media, Using a Low Reynolds k-ε Model, and an Infinite Array, of Transversally Displaced Elliptic Rods, 585

Computational Analysis, of Turbulent Fluid Flow, and Heat Transfer, Over an Array, of Heated Modules, Using Turbulence Models, 669

Effect, of Heated Wall Position, on Mixed Convection, in a Channel, with an Open Cavity, 259

Effect, of Surface Roughness, on Nitrogen Flow, in a Microchannel, Using the Direct Simulation, Monte Carlo Method, 1

Enclosed Buoyant Convection, of a Variable-Viscosity Fluid, Under Time-Periodic, Thermal Forcing, 137

Enhancement, of Heat Transfer, from Surface-Mounted, Block Heat Sources, in a Duct, with Baffles, 827

Entropy Analysis, in Au-Cr Two Layer Assembly, During Laser Shortpulse Heating, 179

Entropy Generation, on a Crossflow Heat Exchanger, Including Three Gas Streams, with Different Arrangements, and the Effect, of Longitudinal Wall Conduction, 619

Flow, and Heat Transfer, Around a Surface-Mounted, Blunt Obstacle, 465

Heat Transfer, and Hydromagnetic Control, of Flow Exit Conditions, Inside Oscillatory Squeezed, Thin Films, 239

Inverse Boundary Design, Radiation Problem, in Absorbing-Emitting Media, with Irregular Geometry, 565

Investigation, of Radiative Heat Transfer, in Complex Geometries, using Blocked-Off, Multiblock, and Embedded Boundary Treatments, 807

Jet Impingement, onto a Hole, with Constant Wall Temperature, 843

Local Zoom Computation, of Two-Phase Flows, in Steam Generators, Using a Local Defect Correction Method, 111

Method for Computing the Interaction, of Fire Environment, and Internal Solid Regions, 777

Mixed Convection, Induced, by MEMS-Based, Thermal Shear Stress Sensors, 283
Modified Macroscopic Turbulence Modeling, for the Tube, with Channel Geometry, in Porous Media, 659

Natural Convection, in a Thermally Stratified, Wavy Vertical Porous Enclosure, 753
Natural Convection, in a Partitioned Trapezoidal Cavity, Heated from the Side, 543
New Evaluation, of the k-ε Turbulence Model, for Buoyant Plumes, 731
Numerical Analysis, of the Stress Jump Interface Condition, for Laminar Flow, Over a Porous Layer, 603
Numerical Computation, for Natural Convection, of Air, in a Cubic Enclosure, Under Combination, of Magnetizing and Gravitational Forces, 449
Numerical Computation, on the Control of Aerial Flow, by the Magnetizing Force, in Gravitational and Nongravitational Fields, 9
Numerical Investigation, of Flow, Through a Cavity, with Internal Heat Generation, 525
Numerical Investigation, of Heat Transfer, in Intensive Cooling Tubes, with Turbulence Brushes, 367
Numerical Investigation, of Heat Transfer, of a Heated Channel, with an Oscillating Cylinder, 639
Numerical Simulation, of Two-Dimensional, Heat and Moisture Transfer, During Drying, of a Rectangular Object, 867
Numerical Study, of a Heated Pulsed Axisymmetric Jet, in Laminar Mode, 409
Numerical Study, of Heat Transfer, During Unsaturated Flow, in Dual-Scale Porous Media, 385
Numerical Study, of Turbulent Natural Convection, in a Side-Heated Square Cavity, at Various Angles of Inclination, 693

Optimization, of Natural Convection Heat Transfer, from a Cylinder, with High Conductivity Fins, 65

Prediction, of Onset, of Boundary Layer Transition, in Film Condensation, on Horizontal Elliptical Cylinder, 83
Pressure Drop, and Heat Transfer, in Spanwise-Periodic Fluted Channels, 47

Spectral Methods, with Postprocessing, for Numerical Hyperbolic Heat Transfer, 717

Temperature Distribution, of an Optical Fiber, Traversing Through a Chemical Vapor Deposition Reactor, 221
Thermal Equilibrium, in Transient Conjugated Forced-Convection Channel Flow, 327
Thermosolutal Transfer, Within Trapezoidal Cavity, 431
Transient Linear, and Nonlinear Heat Conduction, in Weakly Modulated Domains, 481

Visualization, and Simulation, of the Natural-Convection Flow, Above Horizontal Wavy Plates, 307

Winglet-Type Vortex Generators, with Common-Flow-Up Configuration, for Fin-Tube Heat Exchangers, 201
